

Revised: 06/10/19

### 1: Identification

| Product Name:         | POLYBASE                                                        |
|-----------------------|-----------------------------------------------------------------|
| Common Name/Synonym:  | Water-based Adhesive/Base Coat                                  |
| Recommended Use:      | EIFS Coating                                                    |
| Manufacturer:         | EZWALL Coatings, Inc.<br>1001 Forest Avenue Dallas, Texas 75215 |
| Contact Phone Number: | 214-428-1886                                                    |
| Emergency:            | Chemtrec: +1 703-527-3887 ex-USA                                |
|                       | Chemtrec: 1-800-424-9300 USA                                    |

### 2: Hazard(s) Identification

| Classification:             | Carcinogenicity - Category 1A                                                                      |
|-----------------------------|----------------------------------------------------------------------------------------------------|
| Signal Word:                | Danger                                                                                             |
| Hazard Statements:          | May Cause Cancer                                                                                   |
| Precautionary Statement(s): | Wash hands thoroughly after handling.                                                              |
|                             | Do not eat, drink or smoke when using this product.                                                |
|                             | Avoid release to the environment.                                                                  |
|                             | Wear protective gloves/protective clothing/eye protection/face protection.                         |
|                             | IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.                         |
|                             | IF ON SKIN: Wash with plenty of water.                                                             |
|                             | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and |
|                             | easy to do. Continue rinsing.                                                                      |
|                             | Rinse mouth.                                                                                       |
|                             | If skin irritation occurs: Get medical advice/attention.                                           |
|                             | If eye irritation persists: Get medical advice/attention.                                          |
|                             | Take off contaminated clothing and wash it before reuse.                                           |
|                             | Collect spillage.                                                                                  |
|                             | Dispose of contents/container in accordance with Local, State, Federal and Provincial regulations. |

Hazards not otherwise classified that have been identified during the classification process:

| Eye:        | May cause irritation.                                                           |
|-------------|---------------------------------------------------------------------------------|
| Skin:       | May cause irritation.                                                           |
| Inhalation: | Prolonged or excessive inhalation may cause respiratory tract irritation.       |
| Ingestion:  | Ingestion can cause gastrointestinal irritation, nausea, vomiting and diarrhea. |

## 3: Composition/Information on Ingredients

| Chemical Name                           | CAS #      | Ingredient Percent by<br>Weight |
|-----------------------------------------|------------|---------------------------------|
| ACRYLIC POLYMER                         | No data    | 10 - 30 %                       |
| CRYSTALLINE SILICA (CRISTOBALITE)       | 14464-46-1 | 30 - 40 %                       |
| CRYSTALLINE SILICA (QUARTZ/SILICA SAND) | 14808-60-7 | 30 - 40 %                       |
| WATER                                   | 7732-18-5  | 10 - 30 %                       |

### 4: First Aid Measures

### Necessary measures by relevant routes of exposure:

| Eye Contact:  | Immediately flush eyes with plenty of water for at least 15 to 20 minutes. Ensure adequate flushing of the eyes by separating the eyelids with fingers. Get immediate medical attention. |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin Contact: | Immediately wash skin with plenty of soap and water for 15 to 20 minutes, while removing contaminated clothing and shoes. Get medical attention if irritation develops or persists.      |
| Inhalation:   | If inhaled, remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel.<br>Seek immediate medical attention.                                 |
| Ingestion:    | If swallowed, do NOT induce vomiting. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.                                      |

Symptoms acute or delayed: n/a

Other First Aid: First Responders should provide for their own safety prior to rendering assistance.

### **5: Fire Fighting Measures**

| General Information:                               | Water based product                                                                                                                    |
|----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Suitable Extinguishing agents:                     | Product is not combustable. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.    |
| Unusual Hazards:                                   | If heated, a pressure increase will occur and the container may burst. The material may splatter.                                      |
| Protective Equipment/precautions for Firefighters: | As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. |

## **6: Accidental Release Measures**

| Personal Precautions, Protective Equipment, and | Personal protection needs must be evaluated based on information provided on                                                                                                                                      |
|-------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Emergency Procedures:                           | this sheet and the special circumstances created by the spill including; the                                                                                                                                      |
|                                                 | material spilled, the quantity of the spill, the area in which the spill occurred, and                                                                                                                            |
|                                                 | the training and the expertise of employees in the area responding to the spill.                                                                                                                                  |
| Environmental Precautions:                      | Prevent product from entering drains. Do not flush into surface water or sanitary                                                                                                                                 |
|                                                 | sewer system.                                                                                                                                                                                                     |
| Methods for containment:                        | Contain spills with an inert absorbent material such as soil, sand or oil dry.                                                                                                                                    |
| Methods for cleanup:                            | Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Provide ventilation. Clean up spills immediately observing precautions in the protective equipment section. |

## 7: Handling and Storage

#### Precautions for Safe Handling:

| Safe Handling:                                                | Handle in accordance with good industrial hygiene and safety practice.                  |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Hygiene Measures:                                             | Handle in accordance with good industrial hygiene and safety practice.                  |
| Conditions for Safe Storage, including any incompatibilities: |                                                                                         |
| Storage:                                                      | Keep in a dry, cool and well-ventilated place. Keep out of the reach of children. Store |
|                                                               | in accordance with local regulations. Keep from freezing.                               |
| Materials to Avoid:                                           | Strong oxidizing agents. Strong acids. Strong bases.                                    |

## 8: Exposure Controls/ Personal Protection

### Exposure Guidelines:

| Name:                                   | ACGIH TLV                         |
|-----------------------------------------|-----------------------------------|
| CRYSTALLINE SILICA (CRISTOBALITE)       | TWA: 0.025 mg/ $m^3$ (respirable) |
| TITANIUM OXIDE                          | TWA: 10 mg/m <sup>3</sup>         |
| CRYSTALLINE SILICA (QUARTZ/SILICA SAND) | TWA: 0.025 mg/m3 (respirable)     |

Engineering Measures:

Ensure adequate ventilation, especially in confined areas.

| Individual protection measures: |                                                                                                                                                                                                 |  |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Eye/Face Protection:            | If splashes are likely to occur, wear:. Tightly fitting safety goggles.                                                                                                                         |  |
| Skin/Body Protection:           | Wear protective gloves/ protective clothing.                                                                                                                                                    |  |
| Respiratory Protection:         | Respiratory protection No protective equipment is needed under normal use conditions. If exposure limits are exceeded or irritation is experienced, ventilation and evacuation may be required. |  |
| Hygiene Measures:               | See section 7 for more information                                                                                                                                                              |  |

# 9: Physical and Chemical Properties

## Properties

| Form:             | Liquid           |
|-------------------|------------------|
| Appearance:       | Off - White      |
| Odor:             | Slight           |
| pH:               | >8               |
| Boiling Point:    | Not determined.  |
| Melting Point:    | Not determined.  |
| Specific Gravity: | 0.96 - 1.80 g/cc |
| Solubility:       | Miscible         |
| Vapor Density:    | 8.0 - 15.0       |
| Evaporation Rate: | >1               |
| Flash Point:      | Not determined.  |
| VOC:              | Not determined.  |

# **10. Stability and Reactivity**

| Reactivity:                         | No dangerous reaction known under conditions of normal use.               |
|-------------------------------------|---------------------------------------------------------------------------|
| Chemical Stability:                 | Stable under recommended storage conditions.                              |
| Possibility of Hazardous Reactions: | None under normal processing.                                             |
| Conditions to Avoid:                | Do not freeze. To avoid thermal decomposition, do not overheat.           |
| Incompatible Materials:             | Strong oxidizing agents. Strong acids. Strong bases.                      |
| Hazardous Decomposition Products:   | Thermal decomposition can lead to release of irritating gases and vapors. |

## **11. Toxicological Information**

| Unknown Acute Toxicity:            | < 1% of the mixture consists of ingredient(s) of unknown toxicity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Crystalline Silica (Cristobalite): | Inhalation - Rat TCLo - Lowest published toxic concentration : 248 mg/m3/6H [ Lungs, Thorax, or<br>Respiration - Other changes Biochemical - Metabolism (intermediary) - Other proteins Biochemical -<br>Metabolism (intermediary) - Effect on inflammation or mediation of inflammation ]<br>Inhalation - Rat TCLo - Lowest published toxic concentration : 248 mg/m3/6H [ Lungs, Thorax, or<br>Respiration - Changes in lung weight Immunological Including Allergic - Increase in cellular immune<br>response Biochemical - Metabolism (intermediary) - Effect on inflammation or mediation of<br>inflammation ] |
|                                    | Inhalation - Rat TCLo - Lowest published toxic concentration : 200 mg/kg [ Lungs, Thorax, or<br>Respiration - Fibrosis, focal (pneumoconiosis) Lungs, Thorax, or Respiration - Other changes<br>Nutritional and Gross Metabolic - Changes in iron ]<br>Inhalation - Mouse TCLo - Lowest published toxic concentration : 40 mg/kg [ Lungs, Thorax, or<br>Respiration - Other changes ]                                                                                                                                                                                                                               |
|                                    | Inhalation - Mouse TCLo - Lowest published toxic concentration : 40 mg/kg [ Immunological<br>Including Allergic - Decrease in cellular immune response ]<br>Inhalation - Rat TCLo - Lowest published toxic concentration : 1 mg/kg                                                                                                                                                                                                                                                                                                                                                                                  |
| Ingestion:                         | Oral - Rat TDLo - Lowest published toxic dose : 120 gm/kg [Gastrointestinal - Hypermotility, diarrhea Gastrointestinal - Other changes]                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Carcinogenicity:                   | Crystalline silica in the form of quartz or cristobalite dust causes cancer of the lung Normal application procedures for this product pose no hazard as to the release of crystalline silica dust, but grinding or sanding dried films of this product may yield some respirable crystalline silica.                                                                                                                                                                                                                                                                                                               |
| Titanium Oxide:                    | Inhalation - Mouse TCLo - Lowest published toxic concentration : 43 mg/m3/5H/9D (Intermittent)<br>[ Lungs, Thorax, or Respiration - Pleural effusion Lungs, Thorax, or Respiration - Other changes ]<br>Inhalation - Mouse TCLo - Lowest published toxic concentration : 70 mg/m3/5H/12D (Intermittent)<br>[ Lungs, Thorax, or Respiration - Fibrosis, focal (pneumoconiosis) Lungs, Thorax, or Respiration -<br>Fibrosis (interstitial) Lungs, Thorax, or Respiration - Other changes ]                                                                                                                            |
| Carcinogenicity:                   | Crystalline silica in the form of quartz or cristobalite dust causes cancer of the lung Normal application procedures for this product pose no hazard as to the release of crystalline silica dust, but grinding or sanding dried films of this product may yield some respirable crystalline silica.                                                                                                                                                                                                                                                                                                               |

| Chemical Name                            | LD50 Oral       |
|------------------------------------------|-----------------|
| Crystalline silica (Quartz) (Respirable) | 500 mg/kg (Rat) |

|-----------------------|-------|---------|-------|------|
| Crystalline silica    | A2    | GROUP 1 | KNOWN | -    |
| (Quartz) (Respirable) |       |         |       |      |

## **12: Ecological Information**

| Ecotoxicity:           | < 1 % of the mixture consists of components(s) of unknown hazards to the aquatic environment |
|------------------------|----------------------------------------------------------------------------------------------|
| Environmental Fate:    | Discharge into the environment must be avoided.                                              |
| Soil Mobility:         | No information.                                                                              |
| Other adverse effects: | No known significant effects.                                                                |

#### **13: Disposal Considerations**

Waste Disposal Guidance: This material, as supplied, is not a hazardous waste according to Federal regulations (40 CFR 261). This material could become a hazardous waste if it is mixed with or otherwise comes in contact with a hazardous waste, if chemical additions are made to this material, or if the material is processed or otherwise altered. Consult 40 CFR 261 to determine whether the altered material is a hazardous waste. Consult the appropriate state, regional, or local regulations for additional requirements.

### **14: Transportation Information**

| DOT Shipping Names: | Non regulated. |
|---------------------|----------------|
| DOT Hazard Class:   | Non regulated. |
| IATA Shipping Name: | Non regulated. |
| IMDG UN Number:     | Non regulated. |

### **15: Regulatory Information**

This safety data sheet is prepared to comply with any national and/or regional regulations

### **16: OTHER INFORMATION**

| HMIS Ratings:             |   |
|---------------------------|---|
| HMIS Health Hazard:       | 1 |
| HMIS Fire Hazard:         | 0 |
| HMIS Physical Hazard:     | 0 |
| HMIS Personal protection: | В |
|                           |   |
